

John Deere No. 999 Planter

"Natural cell fill edge delivery seed plates," sloping hopper bottom, improved metal cut-off and roller knocker, makes the most accurate dropping device. Plants thick or butt kernels without losing high degree of accuracy. Handles any kind of corn, beans, peas, sorghum, milo-maize, feterita, beet seed, shelled peanuts and other seeds without changing cut-off. No springs in valve action, valves do not scatter or clog. Even checking regardless of team speed. Variable drop device, having gears in dust-proof case, and running in oil. Can be instantly changed for planting 2, 3, or 4 kernels per hill without stopping team or leaving seat.

Drilling distances can be changed instantly without changing plates or chain. Nine drilling distances obtained with one plate. New automatic marker which requires no attention after starting in field. Regular disc marker furnished if desired. Quick detachable runners which may be taken off by loosening two nuts. Check heads and forks reversible for double wear. Underhung reel which will not kink or snarl wire. Seat-bow and lever rack of steel. Frame securely riveted. Fertilizer or pea attachment can be furnished if desired.

Mr. Arnold has purchased the Webber share in the Blue Star Telephone Company and will soon have his phone installed. They will answer to one short, one long, and one short ring.

Watch the men who use a spreader the year round. They are the men who are prospering and buying more land.

Of course the men who use Nisco Spreaders are ahead, because a Nisco Spreader does a better job and requires less repairs. The hired man likes it, the owner likes it, and surely his wife and children like it, for it helps buy the automobile to make life happier on the farm.

Chris Remm came after his new Nisco and F. F. Follmer is using a new one also.

McCune & Tallman
ALWAYS ON THE JOB

DIAMOND.

Carload New Buggies

We received a carload of new Hercules buggies.

The spring is the better time to buy you a new buggy and while everything else has raised in price more than buggies, they have received a raise and our early buying puts us right on the price.

Our chicken feed and kaffir corn is going out like hot cakes.

Right now is an excellent time to sow Timothy, Red Top and Orchard Grass.

Forget not we handle the American Poultry wire, 19 wires high and (you know us) THE BEST.

Come see your humble servants.

Webb Bros.

What do "You" Know About This?

At age 65 only 5 out of each 100 have anything more than their daily earnings.

If you think it hard to save money now, while you are earning a fair income, how will it be when your earning power grows less?

Start an account at This Bank, conserve your income, and fix yourself to be one of the 5 in your 100.
